

Consumables
done right.

GRIP-X.

**Everything you
need at your
fingertips.**

**You choose the
goods, we build the
cabinet.**

Preface & contents.

Preface.

After years of experience with our GRIP concept, we are proud to introduce our latest consumables concept; GRIP-X.

Adopting this concept for consumables our customers can benefit from cost reductions of over 15% annually. We achieve such by offering modified packaging SKU's which are available in small, medium and large packaging units. In addition, these can be purchased via your local distributor and hence you can keep your own stock levels lower - therefore improving your own cashflow. The product offering in our catalogue is composed from thoughtful analysis and years of experience enabling us to recommend you the best solution for all consumables! For more details please visit sinatec.co.uk.

Contents.

Consumables cabinet.

Consumables cabinet.

By choosing our consumables racking cabinet, you opt for savings of up to 15% annually.

Here you will see an overview of the various options and understand the savings that having a firm grip on your expenditure can bring!

15%

Annual savings

Option 1.

Standard pre-filled cabinet

This cabinet is completely filled with the most common products! Simple, quick and easy - THE solution for your consumables!

* *Sinatec's choice*

Option 2.

Empty cabinet

A. Choose an empty cabinet and choose which product modules you want in your cabinet! (With 100+ pre-filled modules you have plenty to choose from)

B. Choose an empty cabinet and have your current stock renumbered!

Option 3.

Renumbering

Have your current racking solution renumbered to Sinatec products. Read more on page 7.

Use our scanning solution to easily find items that are (almost) empty to place recurring orders! The easiest way to get to GRIPs with your stock.

More information on page 8.

Pre-filled cabinet.

Sinatec's choice

► Filled Modules

Thanks to our many years of experience and acquired expertise, we have put together the contents of this cabinet solution with the most commonly used consumables. It's the 'Sinatec Choice' for a reason.

► Waste No Time

The delivery time of a filled cabinet is short so that you can get started as quickly as possible! When it is delivered, you only have to place the modules in the cabinet as desired. It couldn't be easier!

► Exchange Option

Do you already have an existing solution? Inform for the possibilities to exchange it!

Empty cabinet.

Customised or renumbered

Do you have a special request in terms of contents or do you want a solution for your current stock of consumables? Then choose a empty cabinet.

When you choose a empty cabinet, you have the following 2 options:

A Define your 'custom' contents

► Fully Customised

With more than 100 different standard modules, the choice is huge. If you have specialist request you can even put together your own modules.

► Renumbering

The cabinet is partly filled with the consumables decided by you. The rest of your stock is placed in the new cabinet on-site and renumbered.

► Cost

Request a quote with your custom modules to receive a be-spoke offer.

B Renumber your current stock

► Renumbering

When the empty cabinet is delivered, it will be filled on-site with your current stock and immediately renumbered.

► Cost

Request a quote for current stock renumbering now!

Max. 32
drawer
modules

Stock management.

With Sinatec products

Instead of ordering our cabinet concept, we can also convert your current system. Thanks to their many years of experience, our consumable specialists are very knowledgeable and will help you put an efficient system in place.

► Call-Out Charges

Any travel expenses or additional costs are included in the cost of renumbering

► Working Hours

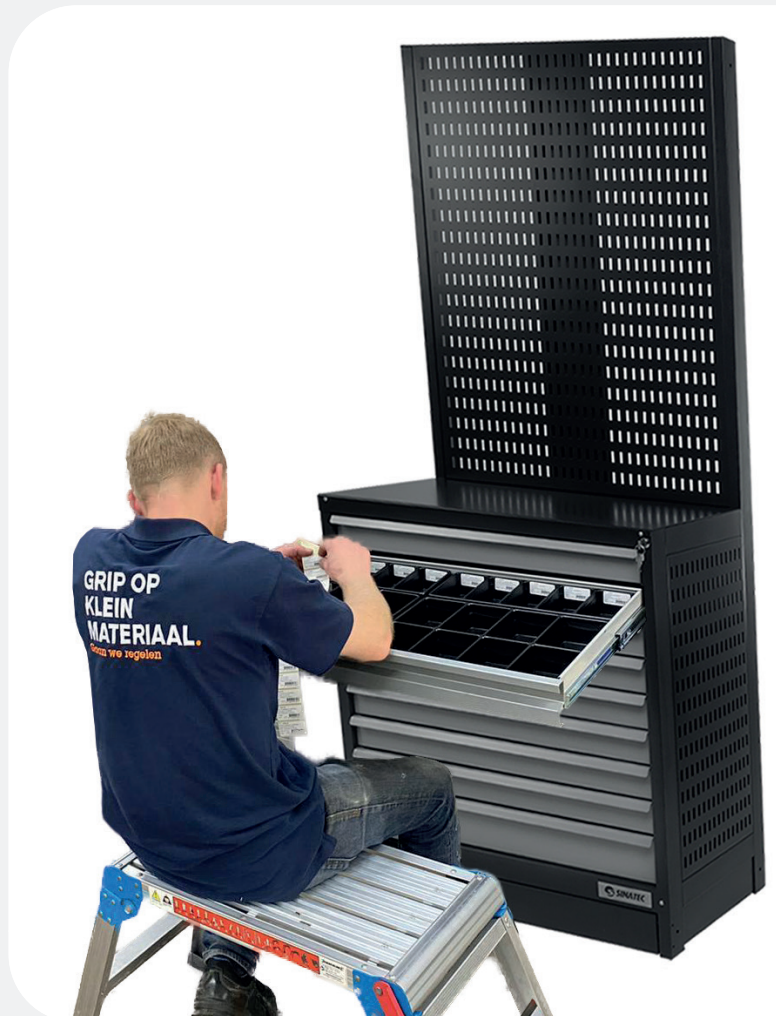

We don't charge any additional working hours for the support

► Stickers

All stickers/labelling materials are included as part of the service.

Advantages of renumbering

- A fully custom setup based on what works for you
- Packaging units based on your specific consumption
- Simple re-ordering via the Sinatec Scan tool

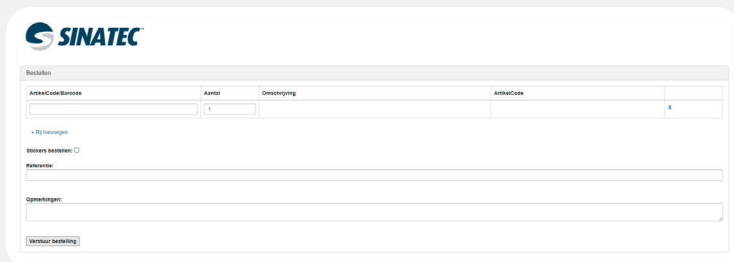

Scan-tool.

Quick and Easy ordering

We have developed the Sinatec Order Tool to make it quick and easy to (re) order consumables. With our handy (wireless) barcode scanner you can easily place an order via your smartphone / tablet / PC.

► Sinatec Order Tool

Would you like more information or access to our scanning solution? Then contact us! We are happy to provide you with more information and ensure that you can access the Sinatec Order Platform. We can also provide a step-by-step breakdown of the process.

The screenshot shows the Sinatec Order Tool web interface. It features a header with the Sinatec logo and a 'Bestellen' (Order) button. Below the header, there are several input fields: 'ArtikelCode/Barcode', 'Artikel', 'Omschrijving', and 'ArtikelCode'. There is also a 'Stickers bestellen' (Order stickers) checkbox and a 'Referentie' (Reference) field. At the bottom, there is a 'Verstuur bestelling' (Send order) button.

► Barcode scanner (SCANNER-B)

When you have a login for the Sinatec Order Platform and our bluetooth barcode scanner, you can easily and quickly get started ordering items. Connect the barcode scanner with bluetooth to the device on which you want to order. Scan the barcodes of the items you need. When your order is complete, enter your reference and send the order!

► Stickers

Is a sticker damaged or the barcode can no longer be scanned? Don't worry, you can also order new stickers via the Sinatec Order Platform!

► Appropriate Packaging

Are you almost out of an article from a module? In addition to being easy to reorder with the scan tool, we have also ensured that the reordered packaging unit always fits in the appropriate compartment!

Maximum number of drawer modules in a cabinet is 32.

In the cabinet with drawer unit there are 9 drawers in total, whereby the top 8 drawers are intended for the drawer modules. 4 drawer modules fit in a drawer, which means that you can store a maximum of 32 drawer modules in one cabinet.

Do you need more drawer modules? Then opt for extension, see page 60!

Extension cabinets.

Extension cabinets.

Choose your setup

GRIP-500.

Do you want more than 32 drawer modules or need more drawers? Then you can opt for an extensions in the form of an extra cabinet, the GRIP-500.

With our compatible solution, the GRIP-501, you can add this extensions very easily. This way you create one worktop for your double cabinet setup.

The drawer unit can be easily closed with the built-in lock and the supplied keys.

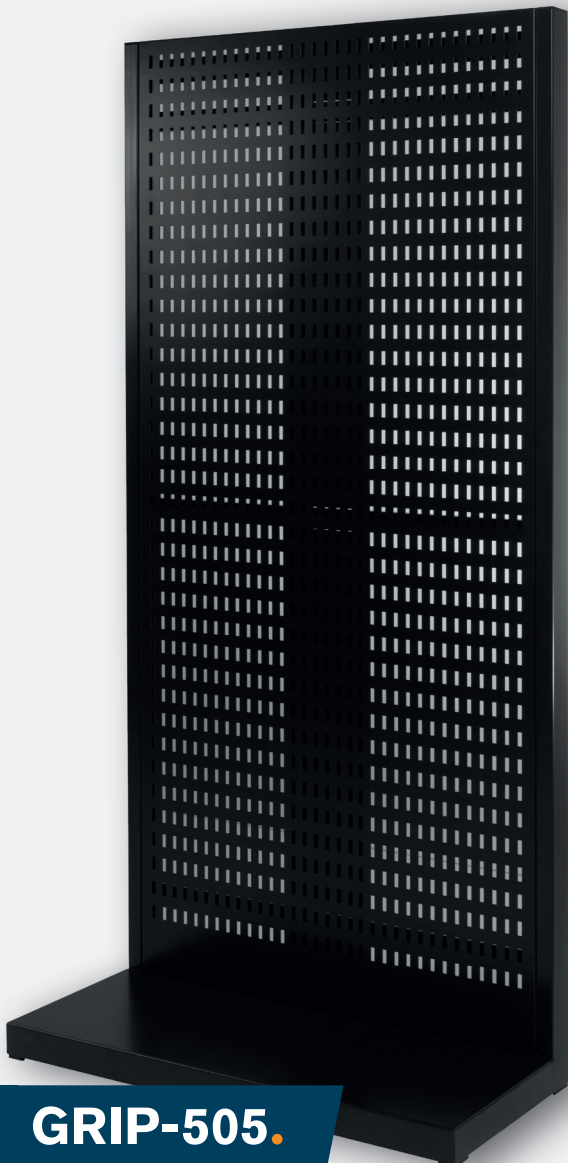

GRIP-506.

No need for extra drawers? Then choose the GRIP-506. Besides our drawer cabinet, you can also opt for our cabinet with storage space incl. 2 doors.

A shelf is included with this cabinet setup to divide the bottom storage space into 2 parts. This solution caters for larger items that need storing.

The cabinet doors are easy to close with the built-in lock and the supplied keys.

GRIP-505.

Need more display space than storage space? Then our GRIP-505 is the perfect solution. This perforated wall includes upright & base and can be mounted against a wall.

Use the wall for our various accessories such as cable reel holders, hose clamp holders and supplement with perforated hooks.

Perfect to hang your cables!
